Media Release

100 Tonnes... and Counting

Great Divide Mining (ASX:GDM) has reached another significant operational milestone, with the 100th tonne of gold concentrate now shipped from its Challenger Gold Mine near Adelong, NSW. The achievement reflects the Company's continued transition from explorer to gold producer, with regular concentrate shipments and recurring operating cash flow underpinning the next stage of Challenger's restart.

Since recommencing operations, GDM has adopted a disciplined, environmentally responsible mining approach, recovering gold through gravity separation using only recycled water throughout the processing circuit.

The achievement follows a series of operational milestones delivered over the past twelve months as the Company steadily builds sustainable production at Challenger. Each shipment supports local employment, local contractors and the continued restart of one of the Riverina's historic gold mines.

Chief Executive Officer Justin Haines said reaching 100 tonnes of shipped gold concentrate demonstrated that consistent execution was delivering tangible results.

“Every shipment represents another step forward for Great Divide Mining,” said Mr. Haines. “Reaching 100 tonnes of gold concentrate confirms Challenger is delivering the consistent, reliable production we set out to achieve.”

“We’re proving that profitable gold production and responsible environmental management can work hand in hand, building a sustainable mining operation for the long term.”

“At GDM we stay focused on what matters—safe operations, disciplined execution, responsible mining and positive cash flow,” said Haines. “That’s how we built this business, and that’s exactly how we’ll continue growing it.”

“GDM is no longer proving it can operate; it’s proving it can operate consistently,” said Haines.

ENDS

100th tonne of gold concentrate departs Great Divide Mining's Challenger Gold Mine near Adelong, marking another milestone in the Company's transition to sustained, cash-generating gold production.

Great Divide Mining Ltd (ASX: GDM)

Great Divide Mining is an Australian Gold, Antimony and critical metals miner, explorer, developer and producer with five projects across 17 tenements (including two in application). GDM's focus is on operating producing assets within areas of historical mining and past exploration with nearby infrastructure, thus enabling rapid development. Through a staged exploration and development programme, GDM intends to generate cash flow from its initial projects to support further exploration across its portfolio of highly prospective tenements.
